SUMMARY

Software engineer who prioritizes the values of hard work, respect, inclusion, and innovation as fundamental to success. My primary focus is on Frontend Development, complemented by valuable experience in Backend. I maintain a proactive and adaptable approach, always eager to acquire new technologies essential for project success.

EDUCATION

B.S. Computer Science, California State University Northridge

2017 - 2022

SKILLS

Frontend Skills	HTML, CSS, JavaScript, React, React Native, Redux, Angular, TypeScript, Laravel
Backend Skills	Node.js, Express.js, RESTful APIs, MySQL, MongoDB, Firebase
Other	C, C++, Java, Python, Git, Photoshop, Figma

EXPERIENCE

Snap Engineering Academy Scholar

June 2021 - Aug 2021

Snap Inc.

Santa Monica, CA

- Participated as one of 15 scholars selected from over 100 applicants in the Los Angeles metropolitan area for an intensive, 8-week engineering program with Next Shift Learning, LA-Tech, and Snap Inc.
- Applied expertise in Full-Stack Development, GitHub, and utilized third-party libraries like p5.js, ml5.js, and firebase during the program.
- Actively contributed to a cross-functional team of 5 peers, collaborating on the design and implementation of a new socially conscious Snap feature.
- Executed tasks following industry best practices, including contributing to projects on Git and GitHub, conducting code reviews with/for teammates, and extending an existing codebase.

Graphic Designer

Aug 2020 - Jan 2021

Los Angeles City College

Los Angeles, CA

- Created visually attractive flyers and social media posts to advertise Veterans Resource Center resources, workshops, and other events.

Hospital Corpsman

Mar 2012 - Apr 2017

U.S. Navy

- Provided patient care and administrative customer support towards Military members and their families.
- Experience with taking vital signs, registering appointments, providing shots, and assessing medical issues.

PROJECTS

Web Portfolio. Built a web portfolio that showcases projects that I have built over time during my education. Newer projects will be added here. ([Check it out here](#))

Snap Nourish. Collaborated with other Snapchat scholars to build a mock up feature using the Snapchat application map section. The purpose of Snap Nourish was to bring awareness to Snap users about food, security, educate them on healthier food choices through recipes, and provide a resource by giving them local groceries with the most affordable deals.

Blogger. Build a social media website that allows users to connect with people based on mutual hobbies while allowing the choice of filtering out blogs they wish to see or not based on their selected hobbies.
